SUMMARY

Front-end developer who ships production websites and UI in HTML, CSS, JavaScript, TypeScript, and React. Builds Shopify and WordPress storefronts, turns Figma files into page layouts, and handles QA, on-page SEO, and analytics on work that has to go live.

SKILLS

Languages: HTML, CSS, JavaScript, TypeScript

Libraries / frameworks: React, Next.js, Gatsby, Vite, Tailwind CSS

CMS / commerce: Shopify (Liquid, theme sections, cart scripts), WordPress, Elementor

Design: Figma, Adobe Creative Suite, Canva

Tooling: Git, VS Code, Cloudflare, Vercel, Google Analytics

EXPERIENCE

Front-End Developer (Contract), Tempura Inc.

May 2026 - Present

United States (Remote)

- Built the company marketing homepage in static HTML, CSS, and JavaScript on Cloudflare, with a skip link, responsive nav, self-hosted fonts, and Content-Security-Policy headers.
- Set a develop/main preview-to-production workflow so staging deploys stay off the live site until a change is ready.

Front-End Developer (Independent)

2026 - Present

Orange County, CA

Nest & Nooks (dormsheets.com), Shopify

- Implemented FLAT30 cart logic: 30% off the second Flat Sheet when two flats are in the cart, combined with existing bundle discounts, then tested cart and checkout.
- Built a delayed promo overlay with rotating codes (FLAT30, FIT30, DUV30), Shopify Forms signup tags, and a mobile announcement bar placed so the floating menu does not cover the offer.

Sculpt Spa, booking app

- Built a React + TypeScript + Vite booking funnel (service cards, week calendar, time slots, validated client form) with Tailwind and shadcn/ui, talking to Boulevard for live services and availability.

User Experience Designer (Contract), CoScript

Aug 2024 - May 2026

United States (Hybrid)

- Designed responsive pages and UI in Figma, then implemented them as HTML, CSS, and JavaScript.
- Partnered with marketing and development on page updates against brand rules and launch dates.
- Added titles, meta tags, alt text, and heading structure so pages could be crawled and understood.
- Used Google Analytics to find drop-off points, then changed layout and content hierarchy.

Marketing Assistant, Steelgem

May 2025 - Jan 2026

Santa Ana, CA (On-site)

- Built and updated WordPress pages (content, layout, QA) so launches stayed accurate and on time.
- Worked with design, development, and marketing in an agile task queue.
- Produced web and mobile assets in Figma, Canva, and Adobe Creative Suite.
- Wrote and edited blogs, landing pages, social captions, and email copy.

EDUCATION

California State Polytechnic University, Pomona

2018 - 2024

Mathematics & Statistics
